VII. Research Interests

My research explores some of the contours of a sociology of climate change – comparative/cross-national levels of public support, the required collective action by nation-states and the international community to address it, and the serious social justice issues that climate change generates. Current projects include critically understanding climate finance and development investments, both public and private in adaptation and mitigation, as well as the levels of cooperation required to make significant reductions in greenhouse gases. Public understanding and concerns over geoengineering. Other projects include articulating Karl Polanyi’s environmental sociology and sustainable institutions built upon Polanyian thinking; investigating sustainable lifestyles in the U.S. – especially around the rapid development of organic farm to table movement in Northwestern Michigan – including its economic

sustainability. With local collaborators, as well as students, I continue decades' long field research in Belize, Central America investigating the challenges to state-civil society relationships in ecological governance, and more recently on the country's engagement with climate change - its domestic actions and international systems of support. This country-level examination helps to ground-truth my international analyses. His earlier research focused on the sociology of biodiversity conservation, organized international reforestation programs, and environmentalisms.

A. Research Grants/Awards

- 2014 Global Climate Change and Inequality: Local to Global Perspectives. Selected Symposium for Rutgers University 100 Days Celebration. \$10,000 (With Tom Rudel; Robin Leichenko; and Karen O'Neil).
- 2013 "Environmental Governance and Conflict Management in Belize"/ Summer Institute Project with Maxwell's PARCC Program and the University of Belize. Oak Foundation. \$218,500 (PI with Catherine Gerard as co-PI) Successful. Three year grant 2013-2018.
- 2009 Several small grants from CEPA and PARCC, Maxwell School for graduate support/ research
- 2008 Initiative Grant, SU/Kaufman Foundation. \$5000. Syracuse Grows Local Foods and Community Gardening Survey [Senior Thesis Project: Elizabeth Slate]
- 2006 Contested Nature – documentary film project with Professor Owen Shapiro, College of Visual and Performing Arts. The film would explore essential efforts to balance both biodiversity and human welfare in St. Lucia Wetland Park, South Africa. Submitted to Ford Foundation (\$180,000). Unsuccessful; Proposal is on hold.
